AN AVALANCHE OF ADVERTISING.

A word of apology is due our readers for the very restricted amount of reading matter to-day. Though all the news will be found in these pages, it is unduly and unusually

The advertisements came upon us in a perfect avalanche at a late hour this morning, leaving no time to arrange for a paper of

A This mass of advertising is, however, one phase of the rapidly accumulating evidence of THE EVENING WORLD'S extraordinary suc-

Our motto has been, " Above All a Newspaper; Beyond All a Public Servant." And to this may fairly be added, "Before All a Recessity to New York's Business Community."

A DUPLICATE GAME.

That baseball bulletin is a public benefactor. Yesterday it gave from two to three asand people who were unable to get to the Polo Grounds the pleasure of practically witnessing the great game of baseball played by New York against St. Louis as the first of the champtonship series.

It was amusing to see the eagerness with which the crowd watched the pins as they were adroitly moved on the novel "diamond" board, and to hear the expert comments made as point after point in the game was recorded on the mimic field. No more attractive novelty has ever been offered to the people of New York than THE WORLD's simultaneous playing on Park Row of the game in progress at the Polo Grounds.

WHERE THE BLAME LIES.

The people are disposed to clamor against the bakers for raising the price of bread. But the bakers are not to blame. The fault lies with the grain gamblers who use their large capital to "corner" the wheat market. This forces up the price of flour, and it is unreasonable to suppose that the baker can afford to bear the loss. His business only yields him a fair profit, and to this he is entitled.

There is plenty of wheat in the country. The farmers get no better price for it now than they did before "Old HUTCH" commenced to "pinch" the market. As far as the supply goes bread ought to be cheaper than it is. But conspiracies of capital to "corner" the market send up the price of flour unnaturally, and then the poor man has to pay dearer for his bread or to get less for his money.

The blame lies with those who, having the power to make the laws, fail to make the formation of Trusts or gambling in future prices of food products a criminal offense.

#### THE STREET MURDER.

It is ridiculous to attempt a comparison betweensthe Whitechapel murders in London and the assessination of the Italian, ANTONIO Fraccourto, in front of the Cooper Union last Monday. In the one case half a dozen crimes, which must have taken some time to commit, have been perpetrated in the mme neighborhood in London, evidently by the same hand and the police have been powerless to prevent them or to discover the criminal. In the other, a man is struck down suddenly in the streets while no one is near, and the assassin walks away and escapes. The New York crime could be successfully

committed in any city in the world and under the most perfect police system ever devised. The assassin watches his opportuguity and strikes his blow when no one is near. No vigilance could guard against such a murder, and no censure attaches to the police. It is, however, the duty of the force to discover the murderer, and this we have no doubt our efficient detectives will do.

Mayor Hawirr has written a letter of acceptance in which he lauds his own adminis-Arstion and pitches into Tammany as a very wicked organization. But Mayor Hewitt has accepted office every time at Tammany's hands and would have been shouting for Tammany and regularity now as he was a year ago if Tammany had again nominated him for Mayor.
